## Navi-Radar 4000/chart radar

Navi-Radar 4000 performs all the functions of radar and ARPA and can overlay electronic charts and AIS targets on a radar picture and is compliant with latest IMO and IEC standards.

- User friendly, clear and logically structured interface
- Handles primary radar information
- Acquires and processes ARPA tasks (up to 256 targets)
- Displays AIS target on the radar display and targets parameters output on the information panel
- Official ENC/S-57 and Transas TX-97 format electronic vector charts overlay features assist safe and convenient navigation
- Displays routes loaded from external systems' ECDIS/positioning system
- Associates AIS targets with ARPA targets
- Can connect up to 2 GPS, 2 GYRO and 2 LOG+1 DLOG
- Configuration of 2 Radar stations with SW scanner interswitch and provides ability to change rights of navigational Master (station with rights for navdata sources)
- Displays information from 2 targets for data comparison
- Fine adjustment of brilliance and contrast for perfect radar picture tuning
- Flexible in both configuration and chart functionality
